Recyclable

BIODEGRADABLE IN OPEN ENVIRONMENT

End up with water, carbon dioxide and biomass after
completing biodegradation.

Reduce plastic waste left on earth and avoid plastic pollution.

Conventional plastic

Oxo-biodegradable plastic

More than **20-200 YEARS**

to degrade and may become microplastics
which is harmful to the nature.

Less than **3 YEARS**

to biodegrade into water, carbon dioxide
and biomass, and return back to the nature.

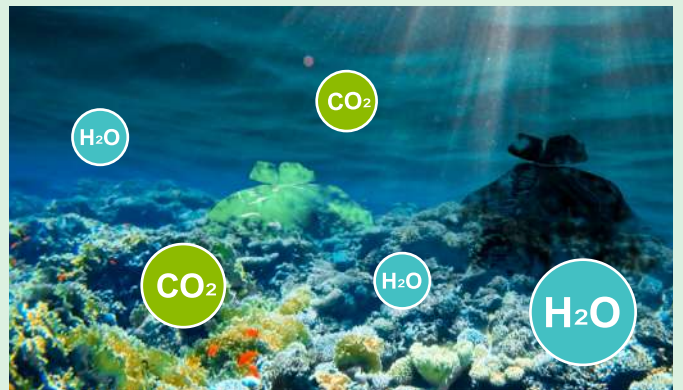

PROCESS OF BIODEGRADATION

Designed to degrade within **3-6 months** in the open environment when exposed to sunlight. The process is accelerated with sunlight but not necessary to have.

It can degrade in dark and marine condition as long as with oxygen.

After oxidative degradation, it will biodegrade into water, carbon dioxide and biomass. Leaving no microplastics or toxic residues.

Proven to leave no microplastics and tested for plant growth to show non-toxicity to soil or nature.

REMARK:

An average lifetime of oxo-biodegradable plastics is 1 year. The duration of biodegradation will depend on the condition of the plastics being left and is accelerated when is exposed to UV light and high temperature for an extended period of time.

WOODEY

PREMIUM QUALITY,
SUSTAINABILITY LIFESTYLE

LARGE CAPACITY

DURABLE

LEAKAGE PROOF

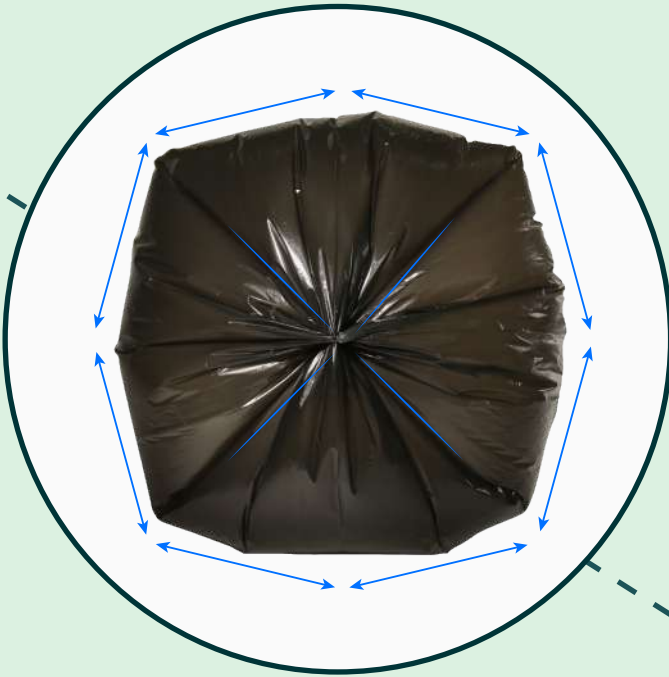

ANTI-PUNCTURE

GLEAN'S LEAKAGE PROOF DESIGN

Perfect thickness
with stronger toughness.
Load more than you think.

LEAKAGE PROOF

PRODUCT DETAILS

NO.1

POINT-BREAK DESIGN

- User-friendly
- Convenient and easily tear off from roll

NO.2

ENVIRONMENTAL-FRIENDLY PE MATERIAL

- High quality virgin grade
- Odorless & non-toxic
- Non-powdery

The Garbage bag without string
Wasted a lot of space

NO.3

STRINGS ON EACH BAG

- Added value
- Higher capacity of loading
- Use every single space
- Lock up waste odor

NO.4

PRINTING

- Great reminder on environmental protection
- Influence the people around you

S SIZE

Designed for Waste Segregation

In 2016, Ministry of Urban Wellbeing, Housing, and Local Government (KPKT) has announced that **households in 8 states** that have signed the Solid Waste and Public Cleansing Management Act will have to start separating their trash into recyclables and non-recyclables. With this case, they have set out a **colored-bag system (non-mandatory)** for recyclables to ease our people in segregating waste.

Paper Waste

Plastic Waste

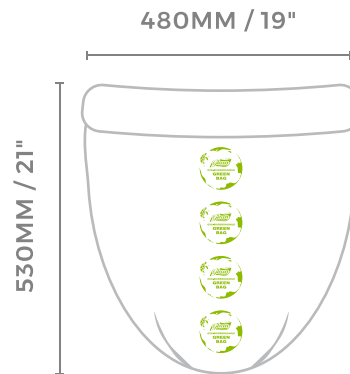

Others (Glass/ceramic, metal/glass, leather, etc)

3 ROLLS X 30 PIECES
(Total 90 Pieces)

Home / Office / Hotel / School

DIAMETER +/- 30CM
18-20 LITRES

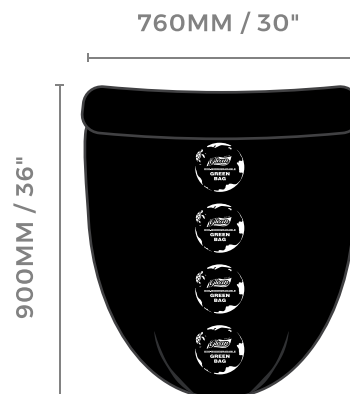

L SIZE

30 PIECES

Home / School / F&B

DIAMETER +/- 46CM
65-90 LITRES

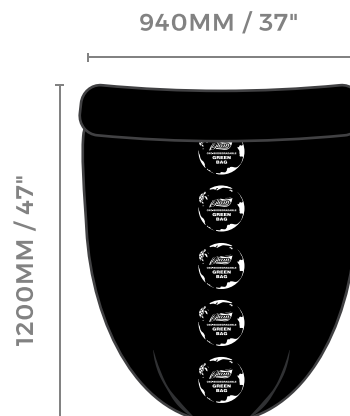

XXL SIZE

10 PIECES

Outdoor / Restaurant / Public Places /
Industrial / Government Uses

DIAMETER +/- 48CM
120-150 LITRES
